- PROFESSIONAL EXPERIENCE
- Frontend Developer | 2024 – Present

 - Built multiple real-world web applications using React.js and Tailwind CSS, including a modern portfolio, e-commerce store, and education platform
 - Implemented advanced UI animations using Framer Motion, enhancing user engagement and interface interactivity
 - Integrated REST APIs to fetch and display live data, such as in the World Atlas project
 - Designed and developed responsive layouts optimized for both mobile and desktop
 - Continuously collaborated with online communities, YouTube tutorials, and GitHub to improve skills and apply best development practices

- SKILLS
- HTML5, CSS3, JavaScript
 - Tailwind CSS, Responsive Design
 - React.js, Framer Motion
 - API Integration, Form Handling
 - Git & GitHub, Version Control

- PROJECTS
- Education Academia – React.js, Tailwind CSS

A modern, animated educational website featuring scroll-based effects, responsive design, tech orbiting hero section, and smooth transitions.

Shopsy E-Commerce – React.js, Context API, Tailwind CSS

Fully responsive e-commerce platform with product filtering, animated product cards and add-to-cart system icon

World Atlas Web – React.js, REST API, Tailwind CSS

Interactive web app that fetches real-time country data from REST APIs, offering country search, filter by continent, and clean visual layout.

Developer Portfolio – React.js, Tailwind CSS, Framer Motion

Personal portfolio with floating tech icons, typewriter animations, background, and EmailJS integration for contact.

EXPERIENCE

Currently seeking my first professional opportunity in front-end development.
